Case #001: The Vanishing Briefcase

> Set in the gritty 1980s, a valuable briefcase has disappeared from the Blue Note Lounge. A witness reported that a man in a trench coat was seen fleeing the scene. Investigate the crime scene, review the list of suspects, and examine interview transcripts to reveal the culprit.

Objectives

```
1.Retrieve the correct crime scene details to gather the key clue.
2.Identify the suspect whose profile matches the witness description.
3.Verify the suspect using their interview transcript.
```

Gathering Information: Place and type from `crime_scene`

```
select * from crime_scene
where type='theft'
and location like 'blue note %'
```

id	date	type	location	description
76	19851120	theft	Blue Note Lounge	A briefcase containing sensitive documents vanished. A witness reported a man in a trench coat with a scar on his left cheek fleeing the scene.

1. Man
2. Trench coat
3. Left cheeck scar

```
select * from suspects
where attire like 'trench %'
and scar like 'left%'
```

id	name	attire	scar
3	Frankie Lombardi	trench coat	left cheek
183	Vincent Malone	trench coat	left cheek

Now we have two suspects with id **3** and **183**.

```
select * from interviews
where suspect_id=3 and transcript not null
```

```
  or suspect_id=183 and transcript not null
```

suspect_id	transcript
183	I wasn't going to steal it, but I did.

Now we can surely know that **Vincent Malone** has done a crime.
